

SPS Commerce Services for Factors

Financial Institutions, or factors, are a critical trading partner within the global supply chain. As more and more companies elect to outsource supply chain functions, optimizing cash flow and controlling costs become increasingly important to all members of the supply chain.

To help these financial institutions better serve the needs of their customers, SPS Commerce's SaaS EDI services offers factors and their supply chain partners greater visibility into the movement of goods, and thus, better manage the movement of money. Benefits include faster invoicing and payment processing, increased order accuracy, and timely reporting and alerting.

SPS Commerce offers the following solutions for Factors:

- EDI Services for visibility to supply chain transactions with customers and their trading partners
- EDI Testing to validate the accuracy of any new or modified EDI documents for any trading partner

Outsourced EDI is the better EDI alternative for factors. SPS Commerce is the recognized SaaS leader in EDI with more than 10,000 customers, pre-built integrations spanning 2,900 unique fulfillment workflows across 1,200 retailers, grocers and distributors, and a customer satisfaction rate of 93%.
