

# UNIVERSAL NETWORK INTEGRATED FULFILLMENT

## Project Assumptions

The following project assumptions are discussed during the pre-sales process and will remain in effect for the duration of the project.

### Universal Network Integrated Fulfillment

- Existing system will have the ability to import and export data unless otherwise stated.
- There will be a single data format for each of the integrated documents, as mutually agreed upon.
- Customer has or will acquire the ability to push and pull files from an external site located at the SPS data center or provide SPS access to push and pull files located at Customer's site unless otherwise stated.
- Files shall be routed to Customer by division, by transaction.
- Files shall be exchanged using a mutually agreed upon data communication method.
- File names will be structured utilizing SPS' standard file naming convention or as mutually agreed upon.
- Customer can provide a testing environment so that systems can run in parallel unless otherwise stated.
- Customer's IT team provides resources to help with the initial design effort, integration and user acceptance testing and deployment.
