

# One Connection. Unlimited Potential.

## SPS Commerce Cloud EDI - Powered by zedSuite

Working with multiple high-volume trading partners and maintaining an EDI relationship can be overwhelming and complex. Redundant keying, duplicate entries, and incompatible applications can all lead to inefficiencies and delays in your supply chain. SPS Commerce Cloud EDI - powered by zedSuite provides the deepest level of integration between SAP Business One and your trading partners' capabilities not available from any other product. Benefit from a single solution that seamlessly merges and manages your key business processes to meet your trading partners' specific EDI requirements.

Designed and built exclusively to connect SAP Business One with the SPS Commerce Universal Network, the cloud EDI service takes control of your trading partner relationships. With the integrated EDI solution, you can manage all order-to-cash documents from sales order to invoice electronically between both companies. Additionally, SPS Commerce Cloud EDI seamlessly translates your EDI transactions to match your trading partners' specific business requirements - all from within SAP Business One.

SPS Commerce Cloud EDI and SAP Business One work seamlessly together to deliver a fully integrated EDI solution for growing businesses who are seeking an efficient and secure way to communicate with their trading partners. If you're a retailer looking to stand out and close sales with some of the largest trading partners around the globe or if you're a vendor seeking greater insight into trading partner performance - SPS Commerce Cloud EDI is the best solution. Simplify compliance, strengthen relationships, and uncover new opportunities for growth with SAP Business One and SPS Commerce.

### SPS Commerce Cloud EDI Benefits:

- Produce standardized document formats that widen your business market to more than 55,000 trading partners using SPS Universal Network exclusively.
- Increase cash flow by reducing your invoicing and payment cycles.
- Effortlessly send and receive real-time catalog, inventory, order, and shipping information from SAP Business One.
- Eliminate the need for building individual point-to-point connections with each trading partner - saving considerable time and financial resources.

zedSuite is an SAP software solutions and technology partner (SSTP) offering solutions that are SAP-certified with SAP Business One. zedSuite's premier web integration services help extend the capabilities of SAP Business One beyond the walls of your growing business.
